

**From ADAS to Connected, Cooperative and Automated Mobility
Improve Performance, Efficiency and Reliability**

Let's build innovative turnkey solutions for your success!

Our consortium is made up of high-tech SMEs addressing road safety challenges and driving experience needs.

Groupement ADAS

- Optimizes product development while proposing modular HW and/or SW solutions.
- Proposes a portfolio of complementary innovative products.
- Supports collaborative approach in problem solving with strategic guidance and effective support.
- Provides creation and integration of ADAS solutions in specific environment.

Our Solutions

Development tools

Groupement ADAS delivers tools to accelerate our customers' products development and innovative projects such as test benches, simulators, advanced electric automotive platform, software and prototyping tools.

Engineering Services

Dedicated teams of experts & engineers to help you in ADAS development and high technology functions such as system integration for demo car, data fusion and deep learning algorithms, data analysis, HMI and human factors.

On board products

Groupement ADAS provides a set of shelf products such as app and web services for driving risk assessment, localization management and mapping.

Testing and validation

Groupement ADAS provides complete validation package: in-house tailored tracks for physical test, data collection, realtime simulation in virtual and real conditions, validation plan and report.

Innovative - Expert - Agile - Reliable
