

YOU DON'T KNOW ME YET

I claim the governance of France because I am convinced that the French nation risks collapsing because of the politics applied and that no presidential candidate of 2022 will be elected. The country will change.

I am also the only one to have a clear vision and a concrete restructuring action plan to create real national cohesion and innovative international cooperation without superiority of one country over another.

My program is societal and has no nationality. I support any country that claims self-sufficiency, sovereignty and the well-being of its people. I carry out diplomatic peace actions independently of any official state structure. I am looking for international support. I will soon be communicating in many languages.
